

1. Electric shock occurs when:

- A) Voltage is present
- B) Current flows through body
- C) Resistance increases
- D) Power decreases

Answer: B

2. Safe current limit for human body is approximately:

- A) 1 A
- B) 100 mA
- C) 10 mA
- D) 5 A

Answer: C

3. Earthing is used for:

- A) Increase voltage
- B) Safety
- C) Increase current
- D) Reduce resistance

Answer: B

4. Earthing provides path for:

- A) Normal current
- B) Leakage current
- C) High voltage
- D) Resistance

Answer: B

5. Shock severity depends on:

- A) Current
- B) Time
- C) Path
- D) All of these

Answer: D

6. Dry skin resistance is:

- A) Low
- B) High
- C) Zero
- D) Infinite

Answer: B

7. Wet skin resistance is:

- A) High
- B) Low
- C) Zero
- D) Infinite

Answer: B

8. Electric shock is dangerous due to:

- A) Voltage
- B) Current
- C) Resistance
- D) Power

Answer: B

9. Safety devices protect from:

- A) Voltage

- B) Current
- C) Faults
- D) Power

Answer: C

10. Earth wire color is:

- A) Red
- B) Blue
- C) Green
- D) Black

Answer: C

11. Phase wire color is:

- A) Green
- B) Blue
- C) Red
- D) Yellow

Answer: C

12. Neutral wire color is:

- A) Red
- B) Blue
- C) Green
- D) Yellow

Answer: B

13. Electric burns are caused by:

- A) Voltage
- B) Current
- C) Resistance
- D) Power

Answer: B

14. First aid for shock includes:

- A) Touch directly
- B) Cut supply
- C) Give water
- D) Ignore

Answer: B

15. Insulation prevents:

- A) Current flow
- B) Voltage flow
- C) Heat flow
- D) Power flow

Answer: A

16. Rubber gloves are used for:

- A) Style
- B) Safety
- C) Current flow
- D) Voltage

Answer: B

17. Electrical accidents mainly occur due to:

- A) Carelessness
- B) Voltage
- C) Power

D) Energy

Answer: A

18. Fuse is used for:

A) Protection

B) Measurement

C) Switching

D) Control

Answer: A

19. Proper earthing reduces:

A) Current

B) Shock risk

C) Voltage

D) Power

Answer: B

20. Electrical safety rules are for:

A) Engineers only

B) Workers only

C) Everyone

D) Machines

Answer: C

21. Earthing means:

A) Connecting to air

B) Connecting to ground

C) Connecting to voltage

D) Connecting to load

Answer: B

22. Types of earthing include:

A) Plate

B) Pipe

C) Rod

D) All

Answer: D

23. Plate earthing uses:

A) Copper plate

B) Iron plate

C) Both

D) None

Answer: C

24. Pipe earthing is:

A) Costly

B) Common

C) Rare

D) Unsafe

Answer: B

25. Earth resistance should be:

A) High

B) Low

C) Medium

D) Infinite

Answer: B

26. Earthing prevents:

- A) Voltage
- B) Shock
- C) Current
- D) Power

Answer: B

27. Earth electrode is buried in:

- A) Air
- B) Ground
- C) Water
- D) Wire

Answer: B

28. Moist soil is preferred because:

- A) High resistance
- B) Low resistance
- C) No resistance
- D) Infinite

Answer: B

29. Charcoal is used in earthing to:

- A) Increase resistance
- B) Reduce resistance
- C) Increase voltage
- D) Increase power

Answer: B

30. Salt in earthing helps to:

- A) Increase resistance
- B) Reduce resistance
- C) Increase voltage
- D) None

Answer: B

31. Earth wire is connected to:

- A) Live
- B) Neutral
- C) Body of equipment
- D) Battery

Answer: C

32. Earthing is essential for:

- A) Safety
- B) Voltage
- C) Power
- D) Current

Answer: A

33. Earthing system should be checked:

- A) Never
- B) Occasionally
- C) Regularly
- D) Once

Answer: C

34. Earth pit depth is usually:

- A) 1 m
 - B) 2–3 m
 - C) 10 m
 - D) 0.5 m
- Answer: B

35. Earthing conductor is made of:

- A) Copper
 - B) Aluminium
 - C) GI
 - D) All
- Answer: D

36. Earthing resistance is measured by:

- A) Ammeter
 - B) Voltmeter
 - C) Megger
 - D) Earth tester
- Answer: D

37. Earthing avoids:

- A) Leakage current
 - B) High voltage
 - C) Power loss
 - D) Energy loss
- Answer: A

38. Earth electrode material is:

- A) Copper
 - B) GI
 - C) Both
 - D) None
- Answer: C

39. Fault current flows to:

- A) Load
 - B) Source
 - C) Ground
 - D) Neutral
- Answer: C

40. Earthing improves:

- A) Safety
 - B) Voltage
 - C) Power
 - D) Current
- Answer: A

41. Fuse works on:

- A) Heating effect
 - B) Magnetic effect
 - C) Chemical effect
 - D) Light
- Answer: A

42. Fuse element is made of:

- A) Copper
- B) Aluminium

- C) Low melting metal
- D) Iron

Answer: C

43. Fuse protects against:

- A) Over voltage
- B) Over current
- C) Low voltage
- D) Power

Answer: B

44. HRC fuse stands for:

- A) High Resistance
- B) High Rupturing Capacity
- C) High Current
- D) High Relay Circuit

Answer: B

45. Fuse is connected in:

- A) Parallel
- B) Series
- C) Both
- D) None

Answer: B

46. Circuit breaker is used to:

- A) Protect circuit
- B) Measure current
- C) Increase voltage
- D) Store energy

Answer: A

47. MCB stands for:

- A) Mini Circuit Breaker
- B) Main Circuit Breaker
- C) Motor Circuit Breaker
- D) Maximum Circuit Breaker

Answer: A

48. MCB is used in:

- A) Homes
- B) Industries
- C) Both
- D) None

Answer: C

49. Circuit breaker can be:

- A) Reset
- B) Reused
- C) Both
- D) None

Answer: C

50. Fuse cannot be:

- A) Reused
- B) Reset
- C) Both
- D) None

Answer: C

51. ELCB protects against:

- A) Voltage
- B) Current leakage
- C) Power
- D) Resistance

Answer: B

52. RCB detects:

- A) Voltage
- B) Current imbalance
- C) Power
- D) Resistance

Answer: B

53. Trip mechanism works when:

- A) Fault occurs
- B) Normal condition
- C) No current
- D) Low voltage

Answer: A

54. Fuse melts due to:

- A) Cooling
- B) Heating
- C) Voltage
- D) Resistance

Answer: B

55. Circuit breaker works faster than:

- A) Fuse
- B) Relay
- C) Switch
- D) Battery

Answer: A

56. Switch off supply before:

- A) Working
- B) Sleeping
- C) Eating
- D) Running

Answer: A

57. Use insulated tools for:

- A) Safety
- B) Voltage
- C) Current
- D) Power

Answer: A

58. Do not touch with:

- A) Dry hands
- B) Wet hands
- C) Gloves
- D) Shoes

Answer: B

59. Danger sign indicates:

- A) Safety
- B) Risk
- C) Power
- D) Energy

Answer: B

60. Overloading causes:

- A) Heating
- B) Cooling
- C) Voltage drop
- D) Resistance

Answer: A

61. Short circuit causes:

- A) High current
- B) Low current
- C) No current
- D) Voltage drop

Answer: A

62. Electrical fire can be controlled by:

- A) Water
- B) Sand
- C) Foam
- D) Both B and C

Answer: D

63. Water should not be used because:

- A) Conducts electricity
- B) Expensive
- C) Heavy
- D) None

Answer: A

64. Safety shoes protect from:

- A) Shock
- B) Heat
- C) Power
- D) Voltage

Answer: A

65. Rubber mats are used for:

- A) Comfort
- B) Safety
- C) Decoration
- D) Heat

Answer: B

66. Earthing pin is longer for:

- A) Safety
- B) Style
- C) Voltage
- D) Current

Answer: A

67. Three pin plug includes:

- A) Phase

- B) Neutral
- C) Earth
- D) All

Answer: D

68. Leakage current flows through:

- A) Load
- B) Earth
- C) Neutral
- D) Phase

Answer: B

69. Safety standards are defined by:

- A) IS rules
- B) Government
- C) Both
- D) None

Answer: C

70. Electrical safety is important to:

- A) Save life
- B) Protect equipment
- C) Prevent accidents
- D) All

Answer: D
